Subject: RE: Requested SWPPP
Mr. Thompson,

I would like to confirm receipt of Alaskan Copper's SWPPP and the Level Three Response and Source Control Report. Thank you kindly for responding to my request so thoroughly and expeditiously. I very much appreciate our communications.

After examining the Level Three Report and the SWPPP, I believe that I have a better understanding of the current status of Buildings 3301 and 3223. Just to clarify, is it correct to say that Alaskan Copper is eliminating all industrial activities at these buildings as well as vacating them? If this is the case, discontinuing BMP implementation in those areas may be appropriate. However, I just wanted to clarify for our records.

Thank you for your prompt reply.

Sincerely,

Katelyn Kinn
Legal Affairs Coordinator
Puget Soundkeeper Alliance

Subject: Requested SWPPP

Ms. Kinn:

In response to your request, attached is a copy of Alaskan Copper's current Stormwater Pollution Prevention Plan (SWPPP) for its facility at 3200 6th Ave, S., Seattle, Washington. Alaskan Copper last revised the SWPPP on March 24, 2011.

Also attached is a copy of the Level Three Response and Source Control Report that Alaskan Copper submitted to Ecology on January 29, 2010. The Level Three Report and the SWPPP both discuss stormwater associated with Buildings 3301 and 3223, and site maps attached to each show those buildings within the areas of Alaskan Copper's facility covered by the Industrial Stormwater General Permit. Note, however, that as anticipated in the Level Three Report, as of May 2010 Alaskan Copper discontinued all industrial activity in the drainage area north of Building 3301. As of June 2011 all office staff will be relocated from 3223, and that facility shall become a vacated property.

Alaskan Copper selected and implemented several of the structural and operational source control and treatment Best Management Practices (BMPs) in the Level Three Report.

4/26/2011

AKC-0021634

Consistent with adaptive management, Alaskan Copper is continuing to evaluate whether it is necessary and cost effective to implement additional BMPs identified in the Level Three Report.

Please contact me if you have further questions.

Sincerely,
Gerald A. Thompson
Environmental Assistant
